

Raw Materials for Toothpaste Production

Allantoin	Gums revitalizing ingredient
Aluminium Lactate	Tooth enamel fortifying ingredient
<i>*Aromas – please see list attached & ask for samples!</i>	
Bronopol	Preservative
Calcium Carbonate	Abrasive
Calcium Lactate	Tooth enamel fortifying ingredient
Carbomer	Acrylic thickener
Carrageenan	Natural thickener
Cetylpyridinchloride	Antiseptic, antimicrobial ingredient
Chlorhexidine Digluconate 20%	Disinfectant
Carboxymethyl cellulose NA (CMC Na)	Cellulose thickener
Coconut amidopropyl betaine	Modifying surfactant
Ethylvanillin	Synthetic aroma builder
Methylparaben	Preservative
Menthol natural	Aroma enhancer
Menthol racemic	Aroma enhancer
Propylparaben	Preservative
Silicium dioxide	Abrasive
Sodium Fluoride	Anti-caries agent
Sodium monofluorophosphate	Anti-caries agent
Sodium Lauryl Sulphate 92% needles	Surfactant
Sodium Saccharin	Sweetener
Sorbitol 70%	Emollient
Stannous Fluoride	Anti-caries, professional agent
Tea Tree Oil	Natural antiseptic & aroma ingredient
Triclosan	Antibacterial ingredient
Thyme	Synthetic aroma
Vanillin	Aroma builder
Xylitol	Sweetener
